Join in the 20th birthday celebration, **SUBSCRIBE NOW**, save 23% and you will receive one of these **FREE GIFTS**

All new or renewal subscriptions received between 28 October and 25 November 2013 will be entered into the draw. Or give a gift subscription for Christmas! The gift giver will receive the prize.

Makita RT0700CX5J Compact Trimmer/Router Kit

The Makita RT0700CX5J Compact Trimmer/Router Kit is an awesome tool to add to your woodworking arsenal. It is powered by a 710W motor that delivers 10 000-30 000 r/min, but is lightweight and compact. It has variable speed control, three bases and accessories that allow you to match the tool to your application. The collet size is 6.35mm. It has a trimmer base for smooth and fast cutting; a plunge base with a plunge capacity of 0-35mm; a tilt base and trimmer guide. Also included is a three-piece router bit set. Also supplied is a sustainer case, allowing you to store everything you will need in one place.

Norton Clipper TT180 Tile Saw

Stand a chance to win one of two Norton Clipper TT180 Tile Saws as well as an additional blade for porcelain tile cutting and a small 115mm Atlas Diamond Blade for ceramic tiles (for use on your angle grinder), valued at over R2 000 per prize.

Norton Clipper Diamond Blades and equipment

Clipper is an internationally recognised and respected brand of Norton Saint-Gobain, supplying various types of equipment for masonry, concrete and tile-cutting, with a host of consumables – from Atlas and Clipper – to support different applications. Manufactured to strict safety and quality standards, the tools offer value for money, and there is a tool for every type of user, from the DIY'er to the professional contractor.

For more information, contact 011-961-2000 or 0860-NORTON, or visit www.norton.eu

The Bionic Wrench

The Bionic Wrench is a remarkable patented hybrid of an adjustable wrench with the ease of use of a pair of pliers. In addition, the genius of attaching a bolt/nut on all six flat sides removes the stress and strain on the corners of the bolt. This coupled with the superior gripping action of the jaws, allows the user to complete their work without the wrench slipping off and damaging the bolt. The design of the Bionic Wrench multiplies your hand's gripping force, so you can more easily tighten/loosen bolts. You can develop ratchet-like speed by fully turning the Bionic Wrench, release the grip while still on the bolt, reposition the wrench, tighten the grip – and repeat until finished. The Bionic Wrench family covers 16 SAE sizes, from 1/4 to 1 1/4 inch and 22 Metric sizes, from 7-30mm.
